INTRODUCTION

MICROLOG is an index and document delivery system providing access to current Canadian report literature of reference value from government and institutional sources.

The MICROLOG Index is a monthly publication providing citations to all reports located by our editorial staff.

The document delivery service supplies most of these documents to subscribers on either microfiche or paper.

PUBLICATIONS INCLUDED

MICROLOG includes Canadian federal, provincial and local government publications. Also included are publications of non-government research institutions, professional associations and special interest groups.

The primary criterion for inclusion is reference value; thus research papers and studies are cited, while news releases and general information pieces are not. Annual reports, statistical reviews and financial statements are the only serials appearing in the Index.

MICROFICHE SUBSCRIPTIONS AVAILABLE

Documents from MICROLOG are available on microfiche under various subscription plans, ranging from the complete collection through subsets by level of government, geographic area or subject. The subsets available are listed in the back of the index.

USING THE MICROLOG INDEX

The format of the Microlog 1981 cumulation differs from previous and subsequent volumes. The Bibliocentre Division of Centennial College through the DOBIS/LIBIS library system contributed to the cataloguing and processed the documents. This volume cumulates the previously published issues for 1981 and the unpublished 1981 Restrospective Collection.

The MICROLOG Index is divided into three parts: Main Section, Subject Section and Title Section. The Index is bilingual.

MAIN SECTION

This section lists all publications by individual and corporate authors. References appear only when necessary to link varying forms of corporate names.

SUBJECT SECTION

All documents cited in the Main Section are analysed in the Subject Section, using Library of Congress subject headings.

TITLE SECTION

As a further point of access most documents are listed by title. Documents not having easily identifiable or unique titles (e.g. annual reports) do not appear.

MICROLOG est un index et un système de livraison de documents donnant accès aux rapports canadiens courants, provenant de sources governementales et institutionnelles, et ayant une valeur en tant que référence.

L'index MICROLOG est une publication mensuelle mentionnant tous les rapports trouvés par notre personnel de rédaction.

Le service de livraison de documents fournit aux abonnés un grand nombre de ces documents sur microfiche ou sur papier.

PUBLICATION TRAITES

MICROLOG inclut les publications du gouvernement fédéral canadien, des gouvernements provinciaux et des administrations municipales. Il traite également les publications des institutions de recherche non-gouvernementales, des associations professionelles et des groupes d'intérêt particulier.

Le critère principal de l'inclusion est la valeur en tant que référence; ainsi, les articles et les études de recherche y figurent, tandis que les communiqués et la documentation d'intérêt général n'y figurent pas. Les rapports annuels, les périodiques de statistiques et les états financiers sont les seules publications périodiques qui figurent dans l'index.

ABONNEMENT AUX MICROFICHES DISPONIBLE

Les documents de MICROLOG sont disponibles sur microfiche, et ceci, selon de divers programmes d'abonnement, depuis l'abonnement à la collection complète, jusqu'aux abonnements partiels par gouvernement, par région géoigraphique et par matière. Toutes les collections disponibles sont mentionnées sur la liste à la fin de ce numéro.

UTILISATION DE L'INDEX MICROLOG

Le volume annuel 1981 de Microlog est différent des volumes précédents et de ceux à venir. La Division Bibliocentre du Centennial College a collaboré au catalogage et a traité les documents en utilisant le système DOBIS/LIBIS. Ce volume comprend les numéros publiés de 1981 et aussi la collection rétrospective non-publiée de 1981.

L'index MICROLOG se divise en trois parties, la section principale, la section des matières et la section des titres. L'index est bilingue.

SECTION PRINCIPALE

Cette section énumère toutes les publications par les auteurs particuliers, et les collectivité-auteurs. Il y a des renvois seulement où il est nécessaire de relier les differents noms du même collectivité-auteur.

SECTION DES MATIERES

Tous les documents traités dans la section principale sont analysés dans la section des matières, avec les vedettes-matière Library of Congress.

SECTION DES TITRES

Afin d'être plus accessible, la plupart des documents se présentent par titre et par ordre alphabétique. Ceux qui n'ont pas de titre facile à identifier ou particulier (par example, les rapports annuels) ne figurent pas dans cette section.

All microfilmed documents in this Index are available by individual order.
